Sequence 20, Application US/08981527A
Patent No. 6410262
GENERAL INFORMATION:
APPLICANT: Ouax, Wilhelmus J.
APPLICANT: Kerkman, Richard
APPLICANT: Rockhuizen, Cornelis P.
TITLE OF INVENTION: No. 6410262el Secretion Factors for
TITLE OF INVENTION: Oram-Positive Microorganisms Genes Encoding Them and Method.
TITLE OF INVENTION: of Using It
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       976 cacacreccarrarcraccregeraccegreaccarrearecaccregaacerriceae 1035
